

The Care You Deserve

Joint Replacement Home Program

HELPING PATIENTS RECOVER FASTER AFTER ORTHOPEDIC SURGERY

Sphinx Home Health's Joint Replacement Home Therapy program:

- + Transitions the patient from the hospital to the comfort of home
- + Provides home nursing and therapy as prescribed by the patient's physician
- + Decreases the chance of post-surgical injury by reducing the need to travel outside the home
- + Prevents repeat hospital visits by identifying potential risk factors

Medicare and most private insurance companies cover in-home, post-surgical nursing and therapy services

Sphinx Home Health's Joint Replacement Home Therapy program provides a dedicated care team to each patient, which includes a Patient Care Coordinator and involves Nurses, Physical Therapists and Occupational Therapists as needed.

Patient Care Coordinator

A dedicated Care Coordinator is available to every patient to aid in the transition from the hospital to home

- + Provides educational resources and answers the patient's questions before and after surgery
- + Facilitates delivery of equipment and medical supplies to the patient's home
- + Coordinates home care prior to the patient's discharge
- + Assists in scheduling post-surgical physician appointments

Post-Surgical Care Team

Home nursing and therapy based upon the physician's prescribed care plan and discharge instructions

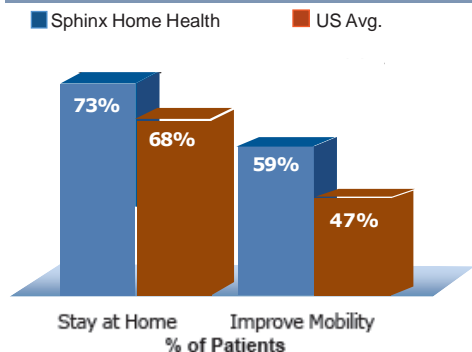

+ Physical and Occupational Therapy

- + Provide exercises to improve mobility, balance and strength
- + Evaluate the home environment for potential hazards and label or remove them as necessary
- + Incorporate Sphinx Home Health's fall prevention and awareness program, to assess and reduce future fall-risk
- + Ultrasound Therapy for joint and muscle pain control, inflammation and tissue repair

+ Nursing Services

- + Blood draws
- + IV antibiotics and anti-coagulants, including dosing services if necessary
- + Wound care
- + Daily monitoring of vitals

Medicare Reported Home Health Compare Quality Measure Results December 2015
